

CERME 6 – TABLE OF CONTENTS

GENERAL INTRODUCTION	XVIII
PLENARY 1	
Signs, gestures, meanings: Algebraic thinking from a cultural semiotic perspective	XXXIII
<i>Luis Radford</i>	
PLENARY 2	
Mathematics education as a network of social practices	LIV
<i>Paola Valero</i>	
SPECIAL PLENARY SESSION	
Ways of working with different theoretical approaches in mathematics education research	1
Introduction	2
<i>Tommy Dreyfus</i>	
Networking of theories: why and how?	6
<i>Angelika Bikner-Ahsbahr</i>	
People and theories	16
<i>John Monaghan</i>	
Discussion	24
WORKING GROUP 1	
Multimethod approaches to the multidimensional affect in mathematics education	26
Introduction	28
<i>Markku S. Hannula, Marilena Pantziara, Kjersti Wæge, Wolfgang Schölglmann</i>	
The effect of achievement, gender and classroom context on upper secondary students' mathematical beliefs	34
<i>Markku S. Hannula</i>	
Changing beliefs as changing perspective	44
<i>Peter Liljedahl</i>	
“Maths and me”: software analysis of narrative data about attitude towards math	54
<i>Pietro Di Martino</i>	
Students' beliefs about the use of representations in the learning of fractions	64
<i>Athanasios Gagatsis, Areti Panaoura, Eleni Deliyianni, Iliada Elia</i>	
Efficacy beliefs and ability to solve volume measurement tasks in different representations	74
<i>Paraskevi Sophocleous, Athanasios Gagatsis</i>	

Students' motivation for learning mathematics in terms of needs and goals.....	84
<i>Kjersti Wæge</i>	
Mathematical modeling, self-representation and self-regulation.....	94
<i>Areti Panaoura, Andreas Demetriou, Athanasios Gagatsis</i>	
Endorsing motivation: identification of instructional practices	104
<i>Marilena Pantziara, George Philippou</i>	
The effects of changes in the perceived classroom social culture on motivation in mathematics across transitions	114
<i>Chryso Athanasiou, George N. Philippou</i>	
“After I do more exercise, I won't feel scared anymore” Examples of personal meaning from Hong-Kong	124
<i>Maike Vollstedt</i>	
Emotional knowledge of mathematics teachers – retrospective perspectives of two case studies	134
<i>Ilana Lavy, Atara Shriki</i>	
Humour as a means to make mathematics enjoyable	144
<i>Pavel Shmakov, Markku S. Hannula</i>	
Beliefs: a theoretically unnecessary construct?	154
<i>Magnus Österholm</i>	
Categories of affect – some remarks.....	164
<i>Wolfgang Schlöglmann</i>	
 WORKING GROUP 2	
Argumentation and proof	174
Introduction.....	176
<i>Maria Alessandra Mariotti, Leanor Camargo, Patrick Gibel, Kristina Reiss</i>	
Understanding, visualizability and mathematical explanation	181
<i>Daniele Molinini</i>	
Argumentation and proof: a discussion about Toulmin's and Duval's models	191
<i>Thomas Barrier, Anne-Cécile Mathé, Viviane Durand-Guerrier</i>	
Why do we need proof.....	201
<i>Kirsti Hemmi, Clas Löfwall</i>	
Proving as a rational behaviour: Habermas' construct of rationality as a comprehensive frame for research on the teaching and learning of proof.....	211
<i>Francesca Morselli, Paolo Boero</i>	
Experimental mathematics and the teaching and learning of proof.....	221
<i>Maria G. Bartolini Bussi</i>	
Conjecturing and proving in dynamic geometry: the elaboration of some research hypotheses.....	231
<i>Anna Baccaglioni-Frank, Maria alessandra Mariotti</i>	
The algebraic manipulator of alnuset: a tool to prove	241
<i>Bettina Pedemonte</i>	
Visual proofs: an experiment	251
<i>Cristina Bardelle</i>	

Teachers' views on the role of visualisation and didactical intentions regarding proof.....	261
<i>Irene Biza, Elena Nardi, Theodossios Zachariades</i>	
Modes of argument representation for proving – the case of general proof.....	271
<i>Ruthi Barkai, Michal Tabach, Dina Tirosh, Pessia Tsamir, Tommy Dreyfus</i>	
Mathematics teachers' reasoning for refuting students' invalid claims.....	281
<i>Despina Potari, Theodossios Zachariades, Orit Zaslavsky</i>	
Student justifications in high school mathematics.....	291
<i>Ralph-Johan Back, Linda Mannila, Solveig Wallin</i>	
“Is that a proof?”: an emerging explanation for why students don't know they (just about) have one	301
<i>Manya Raman, Jim Sandefur, Geoffrey Birky, Connie Campbell, Kay Somers</i>	
“Can a proof and a counterexample coexist?” A study of students' conceptions about proof	311
<i>Andreas J. Stylianides, Thabit Al-Murani</i>	
Abduction and the explanation of anomalies: the case of proof by contradiction.....	322
<i>Samuele Antonini, Maria Alessandra Mariotti</i>	
Approaching proof in school: from guided conjecturing and proving to a story of proof construction.....	332
<i>Nadia Douek</i>	
WORKING GROUP 3	
On “stochastic thinking”	343
<i>Introduction.....</i>	
<i>Andreas Eichler, Maria Gabriella Ottaviani, Floriane Wozniak, Dave Pratt</i>	
Chance models: building blocks for sound statistical reasoning	348
<i>Herman Callaert</i>	
Recommended knowledge of probability for secondary mathematics teachers.....	358
<i>Irini Papaieronymou</i>	
Statistical graphs produced by prospective teachers in comparing two distributions.....	368
<i>Carmen Batanero, Pedro Arteaga, Blanca Ruiz</i>	
The role of context in stochastics instruction.....	378
<i>Andreas Eichler</i>	
Does the nature and amount of posterior information affect preschooler's inferences	388
<i>Zoi Nikiforidou, Jenny Pange</i>	
Student's Causal explanations for distribution	394
<i>Theodosia Prodromou, Dave Pratt</i>	
Greek students' ability in probability problem solving	404
<i>Sofia Anastasiadou</i>	
WORKING GROUP 4	
Algebraic thinking and mathematics education.....	413
<i>Introduction.....</i>	
<i>Janet Ainley, Giorgio T. Bagni, Lisa Hefendehl-Hebeker, Jean-Baptiste Lagrange</i>	

The effects of multiple representations-based instruction on seventh grade students' algebra performance	420
<i>Oylum Akkus, Erdinc Cakiroglu</i>	
Offering proof ideas in an algebra lesson in different classes and by different teachers.....	430
<i>Michal Ayalon, Ruhama Even</i>	
Rafael Bombelli's Algebra (1572) and a new mathematical "object": a semiotic analysis	440
<i>Giorgio T. Bagni</i>	
Cognitive configurations of pre-service teachers when solving an arithmetic-algebraic problem.....	449
<i>Walter F. Castro, Juan D. Godino</i>	
Transformation rules: a cross-domain difficulty.....	459
<i>Marie-Caroline Croset</i>	
Interrelation between anticipating thought and interpretative aspects in the use of algebraic language for the construction of proofs in elementary number theory.....	469
<i>Annalisa Cusi</i>	
Epistemography and algebra.....	479
<i>Jean-Philippe Drouhard</i>	
Sámi culture and algebra in the curriculum	489
<i>Anne Birgitte Fyhn</i>	
Problem solving without numbers – An early approach to algebra.....	499
<i>Sandra Gerhard</i>	
The ambiguity of the sign $\sqrt{\quad}$	509
<i>Bernardo Gómez, Carmen Buhlea</i>	
Behind students' spreadsheet competencies: their achievement in algebra? A study in a French vocational school.....	519
<i>Mariam Haspekian, Eric Bruillard</i>	
Developing Katy's algebraic structure sense	529
<i>Maureen Hoch, Tommy Dreyfus</i>	
Children's understandings of algebra 30 years on: what has changed?.....	539
<i>Jeremy Hodgen, Dietmar Kuchemann, Margaret Brown, Robert Coe</i>	
Presenting equality statements as diagrams	549
<i>Ian Jones</i>	
Approaching functions via multiple representations: a teaching experiment with Casyopee	559
<i>Jean-Baptiste Lagrange, Tran Kiem Minh</i>	
Equality relation and structural properties	569
<i>Carlo Marchini, Anne Cockburn, Paul Parslow-Williams, Paola Vighi</i>	
Structure of algebraic competencies	579
<i>Reinhard Oldenburg</i>	
Generalization and control in algebra	589
<i>Mabel Panizza</i>	
From area to number theory: a case study	599
<i>Maria Iatridou, Ioannis Papadopoulos</i>	
Allegories in the teaching and learning of mathematics	609
<i>Reinert A. Rinvold, Andreas Lorange</i>	

Role of an artefact of dynamic algebra in the conceptualisation of the algebraic equality	619
<i>Giampaolo Chiappini, Elisabetta Robotti, Jana Trgalova</i>	
Communicating a sense of elementary algebra to preservice primary teachers	629
<i>Franziska Siebel, Astrid Fischer</i>	
Conception of variance and invariance as a possible passage from early school mathematics to algebra.....	639
<i>Ilya Sinitsky, Bat-Sheva Ilany</i>	
Growing patterns as examples for developing a new view onto algebra and arithmetic.....	649
<i>Claudia Böttinger, Elke Söbbeke</i>	
Steps towards a structural conception of the notion of variable	659
<i>Annika M. Wille</i>	
WORKING GROUP 5	
Geometrical thinking	669
Introduction.....	
<i>Alain Kuzniak, Iliada Elia, Matthias Hattermann, Filip Roubicek</i>	
The necessity of two different types of applications in elementary geometry.....	676
<i>Boris Girnat</i>	
A French look on the Greek geometrical working space at secondary school level	686
<i>Alain Kuzniak, Laurent Vivier</i>	
A theoretical model of students' geometrical figure understanding	696
<i>Eleni Deliyianni, Iliada Elia, Athanasios Gagatsis, Annita Monoyiou, Areti Panaoura</i>	
Gestalt configurations in geometry learning	706
<i>Claudia Acuña</i>	
Investigating comparison between surfaces.....	716
<i>Paola Vighi</i>	
The effects of the concept of symmetry on learning geometry at French secondary school.....	726
<i>Caroline Bulf</i>	
The role of teaching in the development of basic concepts in geometry: how the concept of similarity and intuitive knowledge affect student's perception of similar shapes.....	736
<i>Mattheou Kallia, Spyrou Panagiotis</i>	
The geometrical reasoning of primary and secondary school students	746
<i>Georgia Panaoura, Athanasios Gagatsis</i>	
Strengthening students' understanding of 'proof' in geometry in lower secondary school	756
<i>Susumu Kunimune, Taro Fujita, Keith Jones</i>	
Written report in learning geometry: explanation and argumentation	766
<i>Silvia Semana, Leonor Santos</i>	
Multiple solutions for a problem: a tool for evaluation of mathematical thinking in geometry.....	776
<i>Anat Levav-Waynberg, Roza Leikin</i>	
The drag-mode in three dimensional dynamic geometry environments – Two studies	786
<i>Mathias Hattermann</i>	
3D geometry and learning of mathematical reasoning	796
<i>Joris Mithalal</i>	

In search of elements for a competence model in solid geometry teaching Establishment of relationships	806
<i>Edna González, Gregoria Guillén</i>	
Students' 3D geometry thinking profiles	816
<i>Marios Pittalis, Nicholas Mousoulides, Constantinos Christou</i>	
WORKING GROUP 6	
Language and mathematics	826
Introduction.....	828
<i>Candia Morgan</i>	
Imparting the language of critical thinking while teaching probability.....	833
<i>Einav Aizikovitsh, Miriam Amit</i>	
Toward an inferential approach analyzing concept formation and language processes	842
<i>Stephan Hußmann, Florian Schacht</i>	
Iconicity, objectification, and the math behind the measuring tape: An example from pipe-trades training	852
<i>Lionel LaCroix</i>	
Mathematical reflection in primary school education: theoretical foundation and empirical analysis of a case study	862
<i>Cordula Schülke, Heinz Steinbring</i>	
Surface signs of reasoning	873
<i>Nathalie Sinclair, David Pimm</i>	
A teacher's use of gesture and discourse as communicative strategies in concluding a mathematical task.....	884
<i>Raymond Bjuland, Maria Luiza Cestari, Hans Erik Borgersen</i>	
A teacher's role in whole class mathematical discussion: facilitator of performance etiquette?	894
<i>Thérèse Dooley</i>	
Use of words – Language-games in mathematics education	904
<i>Michael Meyer</i>	
Speaking of mathematics – Mathematics, every-day life and educational mathematics discourse	914
<i>Eva Riesbeck</i>	
Communicative positionings as identifications in mathematics teacher education.....	924
<i>Hans Jørgen Braathe</i>	
Teachers' collegial reflections of their own mathematics teaching processes Part 1: An analytical tool for interpreting teachers' reflections.....	934
<i>Kerstin Bräuning, Marcus Nührenbörger</i>	
Teachers' reflections of their own mathematics teaching processes Part 2: Examples of an active moderated collegial reflection.....	944
<i>Kerstin Bräuning, Marcus Nührenbörger</i>	
Internet-based dialogue: a basis for reflection in an in-service mathematics teacher education program	954
<i>Mario Sánchez</i>	

The use of algebraic language in mathematical modelling and proving in the perspective of Habermas' theory of rationality.....	964
<i>Paolo Boero, Francesca Morselli</i>	
Objects as participants in classroom interaction	974
<i>Marei Fetzer</i>	
The existence of mathematical objects in the classroom discourse	984
<i>Vicenç Font, Juan D. Godino, Núria Planas, Jorge I. Acevedo</i>	
Mathematical activity in a multi-semiotic environment	993
<i>Candia Morgan, Jehad Alshwaikh</i>	
Engaging everyday language to enhance comprehension of fraction multiplication	1003
<i>Andreas O. Kyriakides</i>	
Tensions between an everyday solution and a school solution to a measuring problem.....	1013
<i>Frode Rønning</i>	
Linguistic accomplishment of the learning-teaching processes in primary mathematics instruction.....	1023
<i>Marcus Schütte</i>	
Mathematical cognitive processes between the poles of mathematical technical terminology and the verbal expressions of pupils	1033
<i>Rose Vogel, Melanie Huth</i>	
WORKING GROUP 7	
Technologies and resources in mathematical education	1043
Introduction.....	1046
<i>Ghislaine Gueudet, Rosa Maria Bottino, Giampaolo Chiappini, Stephen Hegedus, Hans-Georg Weigand</i>	
Realisation of mers (multiple external representations) and melrs (multiple equivalent linked representations) in elementary mathematics software	1050
<i>Silke Ladel, Ulrich Kortenkamp</i>	
The impact of technological tools in the teaching and learning of integral calculus.....	1060
<i>Alejandro Lois, Liliana Milevicich</i>	
Using technology in the teaching and learning of box plots.....	1070
<i>Ulrich Kortenkamp, Katrin Rolka</i>	
Dynamical exploration of two-variable functions using virtual reality	1081
<i>Thierry Dana-Picard, Yehuda Badihi, David Zeitoun, Oren David Israeli</i>	
Designing a simulator in building trades and using it in vocational education	1091
<i>Annie Bessot, Colette Laborde</i>	
Collaborative design of mathematical activities for learning in an outdoor setting	1101
<i>Per Nilsson, Håkan Sollervall, Marcelo Milrad</i>	
Student development process of designing and implementing exploratory and learning objects	1111
<i>Chantal Buteau, Eric Muller</i>	
How can digital artefacts enhance mathematical analysis teaching and learning.....	1121
<i>Dionysis I. Diakoumopoulos</i>	

A learning environment to support mathematical generalisation in the classroom	1131
<i>Eirini Geraniou, Manolis Mavrikis, Celia Hoyles, Richard Noss</i>	
Establishing a longitudinal efficacy study using SimCalc MathWorlds®	1141
<i>Stephen Hegedus, Luis Moreno, Sara Dalton, Arden Brookstein</i>	
Interoperable Interactive Geometry for Europe – First technological and educational results and future challenges of the Intergeo project.....	1150
<i>Ulrich Kortenkamp, Axel M. Blessing, Christian Dohrmann, Yves Kreis, Paul Libbrecht, Christian Mercat</i>	
Quality process for dynamic geometry resources: the Intergeo project.....	1161
<i>Jana Trgalova, Ana Paula Jahn, Sophie Soury-Lavergne</i>	
New didactical phenomena prompted by TI-Nspire specificities The mathematical component of the instrumentation process.....	1171
<i>Michèle Artigue, Caroline Bardini</i>	
Issues in integrating cas in post-secondary education: a literature review	1181
<i>Chantal Buteau, Zsolt Lavicza, Daniel Jarvis, Neil Marshall</i>	
The long-term project “Integration of symbolic calculator in mathematics lessons” The case of calculus	1191
<i>Hans-Georg Weigand, Ewald Bichler</i>	
Enhancing functional thinking using the computer for representational transfer.....	1201
<i>Andrea Hoffkamp</i>	
The Robot Race: understanding proportionality as a function with robots in mathematics class	1211
<i>Elsa Fernandes, Eduardo Fermé, Rui Oliveira</i>	
Internet and mathematical activity within the frame of “Sub14”	1221
<i>Hélia Jacinto, Nélia Amado, Susana Carreira</i>	
A resource to spread math research problems in the classroom	1231
<i>Gilles Aldon, Viviane Durand-Guerrier</i>	
The synergy of students’ use of paper-and-pencil techniques and dynamic geometry software: a case study	1241
<i>Núria Iranzo, Josep Maria Fortuny</i>	
Students’ utilization schemes of pantographs for geometrical transformations: a first classification	1250
<i>Francesca Martignone, Samuele Antonini</i>	
The utilization of mathematics textbooks as instruments for learning	1260
<i>Sebastian Rezat</i>	
Teachers’ beliefs about the adoption of new technologies in the mathematics curriculum	1270
<i>Marilena Chrysostomou, Nicholas Mousoulides</i>	
Systemic innovations of mathematics education with dynamic worksheets as catalysts	1280
<i>Volker Ulm</i>	
A didactic engineering for teachers education courses in mathematics using ICT	1290
<i>Fabien Emprin</i>	
Geometers’ sketchpad software for non-thesis graduate students: a case study in Turkey	1300
<i>Berna Cantürk-Günhan, Deniz Özen</i>	

Leading teachers to perceive and use technologies as resources for the construction of mathematical meanings	1310
<i>Eleonora Faggiano</i>	
The teacher's use of ICT tools in the classroom after a semiotic mediation approach.....	1320
<i>Mirko Maracci, Maria Alessandra Mariotti</i>	
Establishing didactical praxeologies: teachers using digital tools in upper secondary mathematics classrooms	1330
<i>Mary Billington</i>	
Dynamic geometry software: the teacher's role in facilitating instrumental genesis	1340
<i>Nicola Bretscher</i>	
Instrumental orchestration: theory and practice.....	1349
<i>Paul Drijvers, Michiel Doorman, Peter Boon, Sjef van Gisbergen</i>	
Teaching Resources and teachers' professional development: towards a documentational approach of didactics	1359
<i>Ghislaine Gueudet, Luc Trouche</i>	
An investigative lesson with dynamic geometry: a case study of key structuring features of technology integration in classroom practice.....	1369
<i>Kenneth Ruthven</i>	
Methods and tools to face research fragmentation in technology enhanced mathematics education.....	1379
<i>Rosa Maria Bottino, Michele Cerulli</i>	
The design of new digital artefacts as key factor to innovate the teaching and learning of algebra: the case of Alnuset	1389
<i>Giampaolo Chiappini, Bettina Pedemonte</i>	
Casyopée in the classroom: two different theory-driven pedagogical approaches.....	1399
<i>Mirko Maracci, Claire Cazes, Fabrice Vandebrouck, Maria Alessandra Mariotti</i>	
Navigation in geographical space	1409
<i>Christos Markopoulos, Chronis Kynigos, Efi Alexopoulou, Alexandra Koukiou</i>	
Making sense of structural aspects of equations by using algebraic-like formalism.....	1419
<i>Foteini Moustaki, Giorgos Psycharis, Chronis Kynigos</i>	
Relationship between design and usage of educational software: the case of Aplusix	1429
<i>Jana Trgalova, Hamid Chaachoua</i>	
WORKING GROUP 8	
Questions and thoughts for researching cultural diversity and mathematics education	1439
Introduction.....	
<i>Guida de Abreu, Sarah Crafter, Núria Gorgorió</i>	
A survey of research on the mathematics teaching and learning of immigrant students.....	1443
<i>Marta Civil</i>	
Parental resources for understanding mathematical achievement in multiethnic settings.....	1453
<i>Sarah Crafter</i>	
Discussing a case study of family training in terms of communities of practices and adult education.....	1462
<i>Javier Díez-Palomar, Montserrat Prat Moratonas</i>	

Understanding Ethnomathematics from its criticisms and contradictions.....	1473
<i>Maria do Carmo Domite, Alexandre Santos Pais</i>	
Using mathematics as a tool in Rwandan workplace settings: the case of taxi drivers	1484
<i>Marcel Gahamanyi, Ingrid Andersson, Christer Bergsten</i>	
Parents' experiences as mediators of their children's learning: the impact of being a parent-teacher	1494
<i>Rachael McMullen, Guida de Abreu</i>	
Batiks: another way of learning mathematics	1506
<i>Lucília Teles, Margarida César</i>	
The role of Ethnomathematics within mathematics education	1517
<i>Karen François</i>	
WORKING GROUP 9	
Different theoretical perspectives and approaches in mathematics education research	1527
Introduction.....	1529
<i>Susanne Prediger, Marianna Bosch, Ivy Kidron, John Monaghan, Gérard Sensevy</i>	
Research problems emerging from a teaching episode: a dialogue between TDS and ATD	1535
<i>Michèle Artigue, Marianna Bosch, Joseph Gascón, Agnès Lenfant</i>	
Complementary networking: enriching understanding.....	1545
<i>Ferdinando Arzarello, Angelika Bikner-Ahsbabs, Cristina Sabena</i>	
Interpreting students' reasoning through the lens of two different languages of description: integration or juxtaposition?	1555
<i>Christer Bergsten, Eva Jablonka</i>	
Coordinating multimodal social semiotics and institutional perspective in studying assessment actions in mathematics classrooms.....	1565
<i>Lisa Björklund-Boistrup, Staffan Selander</i>	
Integrating different perspectives to see the front and the back: The case of explicitness	1575
<i>Uwe Gellert</i>	
The practice of (university) mathematics teaching: mediational inquiry in a community of practice or an activity system.....	1585
<i>Barbara Jaworski</i>	
An interplay of theories in the context of computer-based mathematics teaching: how it works and why	1595
<i>Helga Jungwirth</i>	
On the adoption of a model to interpret teachers' use of technology in mathematics lessons	1605
<i>Jean-Baptiste Lagrange, John Monaghan</i>	
The joint action theory in didactics: why do we need it in the case of teaching and learning mathematics?.....	1615
<i>Florence Ligozat, Maria-Luisa Schubauer-Leoni</i>	
Teacher's didactical variability and its role in mathematics education	1625
<i>Jarmila Novotná, Bernard Sarrazy</i>	
The potential to act for low achieving students as an example of combining use of different theories	1635
<i>Ingolf Schäfer</i>	

Outline of a joint action theory in didactics	1645
<i>Gérard Sensevy</i>	
The transition between mathematics studies at secondary and tertiary levels; individual and social perspectives.....	1655
<i>Erika Stadler</i>	
Combining and Coordinating theoretical perspectives in mathematics education research.....	1665
<i>Tine Wedege</i>	
Comparing theoretical frameworks in didactics of mathematics: the GOA-model.....	1675
<i>Carl Winslow</i>	
WORKING GROUP 10	
Mathematical curriculum and practice	1685
Introduction.....	
<i>Leonor Santos, José Carrillo, Alena Hospesova, Maha Abboud-Blanchard</i>	
Effective ‘blended’ professional development for teachers of mathematics: Design and evaluation of the “UPOLA” Program	1694
<i>Lutz Hellmig</i>	
Teachers’ efficacy beliefs and perceptions regarding the implementation of new primary mathematics curriculum.....	1704
<i>Isil Isler, Erdine Cakiroglu</i>	
Curriculum management in the context of a mathematics subject group.....	1714
<i>Cláudia Canha Nunes, João Pedro da Ponte</i>	
Gestures and styles of communication: are they intertwined?.....	1724
<i>Chiara André</i>	
Teachers’ subject knowledge: the number line representation	1734
<i>Maria Doritou, Eddie Gray</i>	
Communication as social interaction. Primary School Teacher Practices.....	1744
<i>Antonio Guerreiro, Lurdes Serrazina</i>	
Experimental devices in mathematics and physics standards in lower and upper secondary school, and their consequences on teacher’s practices	1751
<i>Fabrice Vandebrouck, Cecile de Hosson, Aline Robert</i>	
Professional development for teachers of mathematics: opportunities and change.....	1761
<i>Marie Joubert, Jenni Back, Els De Geest, Christine Hirst, Rosamund Sutherland</i>	
Teachers’ perception about infinity: a process or an object?.....	1771
<i>Maria Kattou, Michael Thanasia, Katerina Kontoyianni, Constantinos Christou, George Philippou</i>	
Perceptions on teaching the mathematically gifted.....	1781
<i>Katerina Kontoyianni, Maria Kattou, Polina Ioannou, Maria Erodotou, Constantinos Christou, Marios Pittalis</i>	

The nature on the numbers in grade 10: A professional problem.....	1791
<i>Mirène Larguier, Alain Bronner</i>	
A European project for professional development of teachers through a research based methodology: The questions arisen at the international level, the Italian contribution, the knot of the teacher-researcher identity	1801
<i>Nicolina A. Malara, Roberto Tortora</i>	
Why is there not enough fuss about affect and meta-affect among mathematics teachers?.....	1811
<i>Manuela Moscucci</i>	
The role of subject knowledge in Primary Student teachers' approaches to teaching the topic of area	1821
<i>Carol Murphy</i>	
Developing of mathematics teachers' community: five groups, five different ways	1831
<i>Regina Reinup</i>	
Foundation knowledge for teaching: contrasting elementary and secondary mathematics.....	1841
<i>Tim Rowland</i>	
Results of a comparative study of future teachers from Australia, Germany and Hong Kong with regard to competences in argumentation and proof	1851
<i>Björn Schwarz, Gabriele Kaiser</i>	
Kate's conceptions of mathematics teaching: Influences in the first three years	1861
<i>Fay Turner</i>	
Pre-service teacher-generated analogies for function concepts	1871
<i>Behiye Ubuz, Ayşegül Eryılmaz, Utkun Aydın, Ibrahim Bayazit</i>	
Technology and mathematics teaching practices: about in-service and pre-service teachers	1880
<i>Maha Abboud-Blanchard</i>	
Teachers and triangles.....	1890
<i>Sylvia Alatorre, Mariana Saíz</i>	
Mathematics teacher education research and practice: researching inside the MICA program	1901
<i>Joyce Mgombelo, Chantal Buteau</i>	
Cognitive transformation in professional development: some case studies	1911
<i>Jorge Soto-Andrade</i>	
What do student teachers attend to?.....	1921
<i>Nad'a Stehliková</i>	
The mathematical preparation of teachers: A focus on tasks.....	1931
<i>Gabriel J. Stylianides, Andreas J. Stylianides</i>	
Problem posing and development of pedagogical content knowledge in pre-service teacher training	1941
<i>Marie Tichá, Alena Hospesová</i>	
Sustainability of professional development	1951
<i>Stefan Zehetmeier</i>	
A collaborative project as a learning opportunity for mathematics teachers.....	1961
<i>Maria Helena Martinho, João Pedro da Ponte</i>	
Reflection on Practice: content and depth.....	1971
<i>Christina Martins, Leonor Santos</i>	
Developing mathematics teachers' education through personal reflection and collaborative inquiry: which kinds of tasks?.....	1981
<i>Angela Pesci</i>	

The learning of mathematics teachers working in a peer group	1991
<i>Martha Witterholt, Martin Goedhart</i>	
Use of focus groups interviews in mathematics educational research.....	2000
<i>Bodil Kleve</i>	
Analyses of interactions in a collaborative context of professional development.....	2010
<i>Maria Cinta Muñoz-Catalán, José Carrillo, Nuria Climent</i>	
Adapting the knowledge quarter in the Cypriot mathematics classroom	2020
<i>Marilena Petrou</i>	
Professional knowledge in an improvisation episode: the importance of a cognitive model.....	2030
<i>C. Miguel Ribeiro, Rute Monteiro, José Carrillo</i>	
WORKING GROUP 11	
Applications and modelling	2040
Introduction.....	2042
<i>Morten Blomhøj</i>	
Mathematical modelling in teacher education – Experiences from a modelling seminar	2046
<i>Rita Borrromeo Ferri, Werner Blum</i>	
Designing a teacher questionnaire to evaluate professional development in modelling	2056
<i>Katja Maaß, Johannes Gurlitt</i>	
Modeling in the classroom – Motives and obstacles from the teacher’s perspective.....	2066
<i>Barbara Schmidt</i>	
Modelling in mathematics teachers’ professional development.....	2076
<i>Jeroen Spandaw, Bert Zwaneveld</i>	
Modelling and formative assessment pedagogies mediating change in actions of teachers and learners in mathematics classrooms	2086
<i>Geoff Wake</i>	
Towards understanding teachers’ beliefs and affects about mathematical modelling.....	2096
<i>Jonas Bergman Ärlebäck</i>	
The use of motion sensor can lead the students to understanding the cartesian graph.....	2106
<i>Maria Lucia Lo Cicero, Filippo Spagnolo</i>	
Interacing populations in a restricted habitat – Modelling, simulation and mathematical analysis in class.....	2116
<i>Christina Roeckerath</i>	
Aspects of visualization during the exploration of “quadratic world” via the ICT Problem “fireworks”	2126
<i>Mária Lalinská, Janka Majherová</i>	
Mathematical modeling in class with and without technology.....	2136
<i>Hans-Stefan Siller, Gilbert Greefrath</i>	
The ‘ecology’ of mathematical modelling: constraints to its teaching at university level	2146
<i>Berta Barquero, Marianna Bosch, Josep Gascón</i>	
The double transposition in mathematisation at primary school	2156
<i>Richard Cabassut</i>	
Exploring the use of theoretical frameworks for modelling-oriented instructional design	2166
<i>F.J. García, L. Ruiz-Higueras</i>	

Study of a practical activity: engineering projects and their training context	2176
<i>Avenilde Romo Vázquez</i>	
Fitting models to data: the mathematising step in the modelling process	2186
<i>Lidia Serrano, Marianna Bosch, Josep Gascón</i>	
What roles can modelling play in multidisciplinary teaching.....	2196
<i>Mette Andresen</i>	
Modelling in environments without numbers – A case study.....	2206
<i>Roxana Grigoras</i>	
Modelling activities while doing experiments to discover the concept of variable.....	2216
<i>Simon Zell, Astrid Beckmann</i>	
Modeling with technology in elementary classrooms.....	2226
<i>N. Mousoulides, M. Chrysostomou, M. Pittalis, C. Christou</i>	
WORKING GROUP 12	
Advanced mathematical thinking.....	2236
Introduction.....	
<i>Roza Leikin, Claire Cazes, Joanna Mamona-Dawns, Paul Vanderlind</i>	
A theoretical model for visual-spatial thinking.....	2246
<i>Conceição Costa, José Manuel Matos, Jaime Carvalho e Silva</i>	
Secondary-tertiary transition and students’ difficulties: the example of duality	2256
<i>Martine De Vleeschouwer</i>	
Learning advanced mathematical concepts: the concept of limit	2266
<i>António Domingos</i>	
Conceptual change and connections in analysis	2276
<i>Kristina Juter</i>	
Using the onto-semiotic approach to identify and analyze mathematical meaning in a multivariate context.....	2286
<i>Mariana Montiel, Miguel R. Wilhelmi, Draga Vidakovic, Iwan Elstak</i>	
Derivatives and applications; development of one student’s understanding	2296
<i>Gerrit Roorda, Pauline Vos, Martin Goedhart</i>	
Finding the shortest path on a spherical surface: “academics” and “reactors” in a mathematics dialogue.....	2306
<i>Maria Kaisari, Tasos Patronis</i>	
Number theory in the national compulsory examination at the end of the French secondary level: between organising and operative dimensions.....	2316
<i>Véronique Battie</i>	
Defining, proving and modelling: a background for the advanced mathematical thinking.....	2326
<i>Mercedes García, Victoria Sánchez, Isabel Escudero</i>	
Necessary realignments from mental argumentation to proof presentation	2336
<i>Joanna Mamona-Downs, Martin Downs</i>	
An introduction to defining processes	2346
<i>Cécile Ouvrier-Bufferet</i>	
Problem posing by novice and experts: comparison between students and teachers	2356
<i>Cristian Voica, Ildikó Pelczer</i>	

Advanced mathematical knowledge: how is it used in teaching?.....	2366
<i>Rina Zazkis, Roza Leikin</i>	
Urging calculus students to be active learners: what works and what doesn't.....	2376
<i>Buma Abramovitz, Miryam Berezina, Boris Koichu, Ludmila Shvartsman</i>	
From numbers to limits: situations as a way to a process of abstraction.....	2386
<i>Isabelle Bloch, Imène Ghedamsi</i>	
From historical analysis to classroom work: function variation and long-term development of functional thinking.....	2396
<i>Renaud Chorlay</i>	
Experimental and mathematical control in mathematics.....	2406
<i>Nicolas Giroud</i>	
Introduction of the notions of limit and derivative of a function at a point.....	2416
<i>Ján Gunčaga</i>	
Factors influencing teacher's design of assessment material at tertiary level.....	2426
<i>Marie-Pierre Lebaud</i>	
Design of a system of teaching elements of group theory.....	2436
<i>Ildar Safuanov</i>	
WORKING GROUP 13	
Comparative studies in mathematics education.....	2446
Introduction.....	
<i>Eva Jablonka, Paul Andrews, Birgit Pepin</i>	
Comparing Hungarian and English mathematics teachers' professional motivations.....	2452
<i>Paul Andrews</i>	
Spoken mathematics as a distinguishing characteristic of mathematics classrooms in different countries.....	2463
<i>David Clarke, Xu Li Hua</i>	
Mathematical behaviors of successful students from a challenged ethnic minority.....	2473
<i>Tiruwork Mulat, Abraham Arcavi</i>	
A problem posed by J. Mason as a starting point for a Hungarian-Italian teaching experiment within a European project.....	2483
<i>Giancarlo Navarra, Nicolina A. Malara, András Ambrus</i>	
A comparison of teachers' beliefs and practices in mathematics teaching at lower secondary and upper secondary school.....	2494
<i>Hans Kristian Nilsen</i>	
Mathematical tasks and learner dispositions: A comparative perspective.....	2504
<i>Birgit Pepin</i>	
Elite mathematics students in Finland and Washington: access, collaboration, and hierarchy.....	2513
<i>Jennifer von Reis Saari</i>	
International comparative research on mathematical problem solving: Suggestions for new research directions.....	2523
<i>Constantinos Xenofontos</i>	

WORKING GROUP 14	
Early years mathematics	2533
Introduction.....	2535
<i>Patti Barber</i>	
Girls and boys in “the land of mathematics” 6 to 8 years old children’s relationship to mathematics interpreted from their drawings.....	2537
<i>Päivi Perkkilä, Eila Aarnos</i>	
“Numbers are actually not bad” Attitudes of people working in German kindergarten about mathematics in kindergarten	2547
<i>Christiane Benz</i>	
Learning mathematics within family discourses.....	2557
<i>Birgit Brandt, Kerstin Tiedemann</i>	
Orchestration of mathematical activities in the kindergarten: the role of questions.....	2567
<i>Martin Carlsen, Ingvald Erfjord, Per Sigurd Hundeland</i>	
Didactical analysis of a dice game	2577
<i>Jean-Luc Dorier, Céline Maréchal</i>	
“Tell them that we like to decide for ourselves” Children’s agency in mathematics education.....	2587
<i>Troels Lange</i>	
Exploring the relationship between justification and monitoring among kindergarten children	2597
<i>Pessia Tsamir, Dina Tirosh, Esther Levenson</i>	
Early years mathematics – The case of fractions	2607
<i>Ema Mamede</i>	
Only two more sleeps until the school holidays: referring to quantities of things at home.....	2617
<i>Tamsin Meaney</i>	
Supporting children potentially at risk in learning mathematics Findings of an early intervention study.....	2627
<i>Andrea Peter-Koop</i>	
The structure of prospective kindergarten teachers’ proportional reasoning.....	2637
<i>Demetra Pitta-Pantazi, Constantinos Christou</i>	
How can games contribute to early mathematics education? – A video-based study	2647
<i>Stephanie Schuler, Gerald Wittmann</i>	
Natural differentiation in a pattern environment (4 year old children make patterns)	2657
<i>Ewa Swoboda</i>	
Can you do it in a different way?	2667
<i>Dina Tirosh, Pessia Tsamir, Michal Tabach</i>	
 WORKING GROUP 15	
Theory and research on the role of history in mathematics education	2677
Introduction.....	2679
<i>Fulvia Furinghetti, Jean-Luc Dorier, Uffe Jankvist, Jan van Maanen, Constantinos Tzanakis</i>	
The teaching of vectors in mathematics and physics in France during the 20th century	2682
<i>Cissé Ba, Jean-Luc Dorier</i>	

Geometry teaching in Iceland in the late 1800s and the van Hiele theory.....	2692
<i>Kristín Bjarnadóttir</i>	
Introducing the normal distribution by following a teaching approach inspired by history: an example for classroom implementation in engineering education.....	2702
<i>Mónica Blanco, Marta Ginovart</i>	
Arithmetic in primary school in Brazil: end of the nineteenth century	2712
<i>David Antonio Da Costa</i>	
Historical pictures for acting on the view of mathematics.....	2722
<i>Adriano Demattè, Fulvia Furinghetti</i>	
Students' beliefs about the evolution and development of mathematics	2732
<i>Uffe Thomas Jankvist</i>	
Using history as a means for the learning of mathematics without losing sight of history: the case of differential equations	2742
<i>Tinne Hoff Kjeldsen</i>	
What works in the classroom	
Project on the history of mathematics and the collaborative teaching practice	2752
<i>Snezana Lawrence</i>	
Intuitive geometry in early 1900s Italian middle school.....	2762
<i>Marta Menghini</i>	
The appropriation of the New Math on the Technical Federal School of Parana in 1960 and 1970 decades	2771
<i>Bárbara Winiarski Diesel Novaes, Neuza Bertoni Pinto</i>	
History, heritage, and the UK mathematics classroom.....	2781
<i>Leo Rogers</i>	
Introduction of an historical and anthropological perspective in mathematics: an example in secondary school in France.....	2791
<i>Claire Tardy, Vivianne Durand-Guerrier</i>	
The implementation of the history of mathematics in the new curriculum and textbooks in Greek secondary education	2801
<i>Yannis Thomaidis, Constantinos Tzanakis</i>
